

# Snap Plus Update quick start

Sue Porter, DATCP

608-224-4605

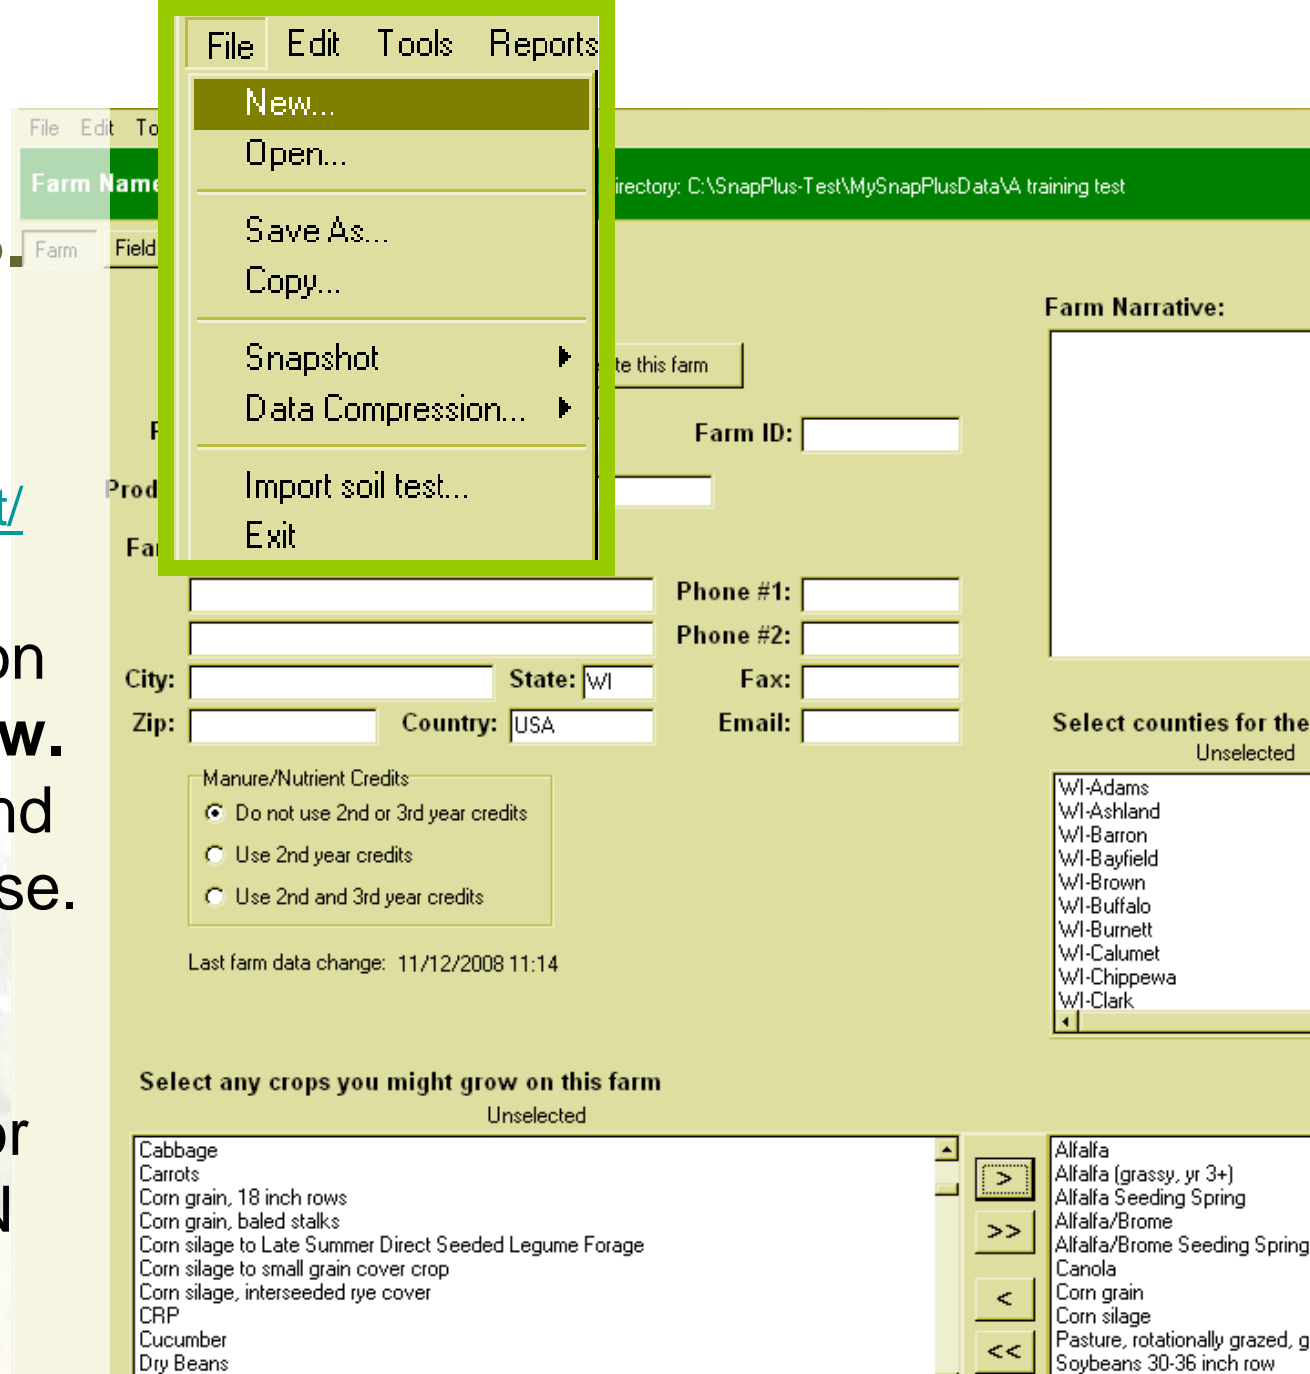

[Sue.porter@wisconsin.gov](mailto:Sue.porter@wisconsin.gov)

# Developing a plan Step 1. 2. 3.

- Install current version

<http://www.snapplus.net/>

- Add new operation with **File** then **New**. Select location and name the database.
- Fill *Farm Screen*. Use 2nd year manure credits for CAFO. Excess N will turn red.

# Developing a plan Step 4.

## Import Soil Tests

- Edit in Snap Plus farm, field, sample names to make each row unique and match map.
- Allows field names like 002 and 02 for alpha numeric order.

The screenshot shows the Snap-Plus 1.126.23 application window. The 'File' menu is open, highlighting the 'Import soil test...' option. Below the menu, the 'SnapPlus Soil Test Import' dialog box is displayed. It contains a text field for the file path, a 'Select File' button, and a 'Data preview' table. The table lists soil test records with columns for LabID, LabSmplID, SmplDate, FarmName, FSAFarm, FieldName, Size, PlowDepth, and SoilSm. Below the table are two checkboxes: 'Use as soil test date for existing data in soil test year or later.' and 'Overwrite existing data'. At the bottom, there are 'Import' and 'Close' buttons, and a status indicator showing '0 records imported'.

**Snap-Plus 1.126.23**

# Developing a plan Step 5.

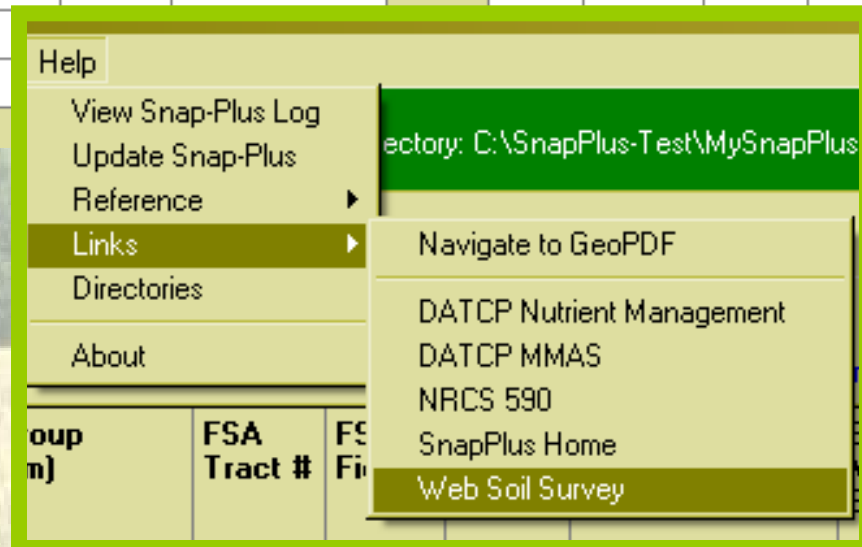

## Field Tab

- Select field dominant critical soil type.
- *Below Field Slope to Water (%)* should be something other than 0-2 if slopes are greater than 6%.
- *Distance to Water (ft)* should be something other than 0-300 if the field is NOT next to surface water.

Go to soil and restriction maps      Restriction definitions

Target pH 6.8	50-59	-	2
	60-69	-	2
	70-79	-	1.5
	80-89	-	1.5
	90-99	-	1.5
	100+	-	1

Lime Applications - (2008 to 2011)

#	Application Name	Year	Season	NI	Rate (tons/a)
1	Lime 1	2008	Spring	65	2

Remaining lime needed = 0

# Developing a plan Step 8.

## *Run Reports*

- ***Soil Test Report*** to check the acres/sample.
- ***Field Data and 590 Assessment Plan Report*** to review the N excess applications, PI, soil test P PPM, rotation P2O5 balance.
- ***Manure Production Report*** to show estimated manure generation by size category annually.
- ***Cropping Trends Report*** starting at the earliest year to show the manure applied annually and the acres of crops grown. *Are the rotations and application working for the farm?*
- ***Spreading and NM Sorted by Crop Report*** to look for consistency in nutrient applications and tillage used for the current plan year.
